

ENI SPY ISLAND PROJECT INJECTION PUMP PACKAGES

OFM-1000 TRIPLEX PUMP 900 HP AC INDUCTION MOTOR

OFM

OFM Pump

For all your Service Needs

The pump package is designed to operate in cuttings injection services. (4.00" plungers)

5.87 BPM	5,000 psig discharge	189 RPM pump speed, 799 HP	1,200 RPM motor
1.17 BPM	6,250 psig discharge	38 RPM pump speed, 200 HP	240 RPM motor

Pump features: Heavy-Duty triplex pump with 6.353 to 1 gear reducer with 8" stroke. The forged steel fluid end is rated at 10,000 psig max discharged pressure (6,250 psig max in fracture mode). It is driven by totally enclosed AC induction motors with VFD variable speed drive controllers. This is a dry sump design with a self contained oil system (pump, filter, stainless steel reservoir, forced air cooler, and thermal mixing valve). Package accessories include pulsation dampeners, pressure gauge, relief valve, suction/discharge piping, and a control panel that displays pump speed, injection rate, discharge pressure, and oil pressure and temperature. Everything is mounted to a structural steel skid with lifting eyes, fork lift slots, and pollution pan.
